# DECORATING SCHOOL

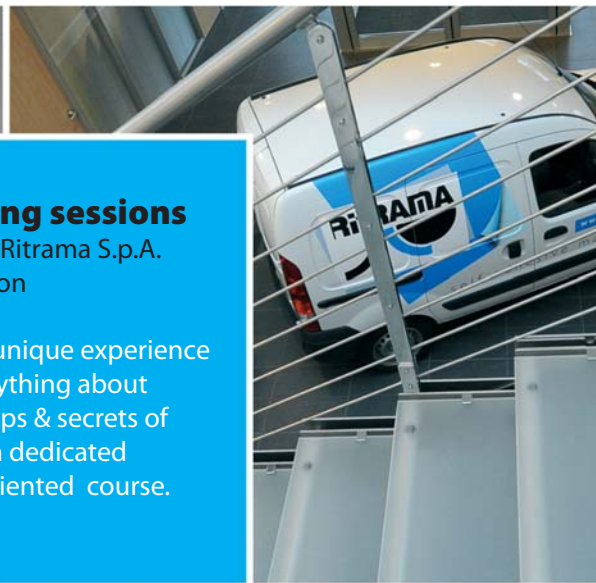

Wrapping session at Ritrama Decorating School

## The training sessions

organised by Ritrama S.p.A.  
Viscom Division

represents a unique experience to learn everything about Procedures, tips & secrets of wrapping in a dedicated technically oriented course.

## Where?

The formative sessions will be held in the headquarters of the Ritrama S.p.A. facility, in Via Senatore Simonetta 24 20867 Caponago (MB) Italy

## Formative Training

The formative session aims at taking self-adhesive users through the entire wrap ping process.

Innovative and creative material solutions designed by Ritrama to wrap vehicles or to renovate interior decorative designs will be presented. The range includes CAST and calendered vinyls and polypropylenes with different textures including carbon, snake skin, wood and brushed effect, to transform vehicles or to help interior architects to create or renew indoor or outdoor living and as well as premium quality films for over lamination to protect and improve the aesthetics of your wrap.

The formative topics focus on the application of pre-cut RI-Mark vinyls, starting from the preparation of cut materials to practical tips on cleaning, temperatures, positioning of the media and solving small but frequent problems. Part of the training , certainly one of the most popular, is focused on wrapping vehicles and furnishings with the extensive RI-WRAP Range that includes the protective films dedicated to lamination essential to the process of protecting the images from scratches, rain and UV rays.

Further interesting additional information is dedicated to tricks and short-cuts to apply adhesive materials on riveted surfaces and using the lateral and central tape bands as well as the wet application on glasses.

The training session provide participants with practical hand-on demonstrations and at the end a RITRAMA Certificate of attendance.

## Main Focus

Ritrama, a leading world class manufacturer of self-adhesive materials, takes a new important step in supplying turnkey solutions for visual communication professionals. The dedicated training, carries exhaustive information about the application of self adhesives that describes in stages from A to Z, how to apply sign-making materials and digitally printed and pattern effect vinyls on to cars, vans and riveted trucks, furnishings but also windows and big glass surfaces.

## To whom is it addressed?

Formative training , such as this one, has been developed to help new and existing customers to explore and enlarge their business with car wrapping and decoration by providing their customer with an extended service and to add value to their applications. Print Service Providers, Applicators, Installers and Sign Schools can benefit from the best practice in wrapping techniques.
