Wine labels innovation

Ritrama self-adhesive barrier wine labelstock combines the technical excellence of the standard products with outstanding conformability, wet resistance and aesthetic qualities. These five new constructions join the established range of papers and expand the already rich range for the wine label industry.

Wine label barrier papers must keep the pace with the most modern wine bottles, as well as with the most old-fashioned ones, enhancing the look of white Wine and Champagne bottles.

Ask for our new Barrier papers

These extra wet resistant papers have been studied to withstand temperature fluctuations and humidity conditions, hence ideal for bottles which are to remain immersed in wet and cold conditions over a period of time, such as white wine and champagne bottles kept in ice-buckets.

Moreover the special wet strength treatment avoids the formation of wrinkles and bubbles during the labelling process and in storage.

Dedicated Adhesive

Specialized acrylic permanent AP903 wine labelling adhesive adhere perfectly to bottles which have to remain immersed in ice-buckets or which are stored in humidity conditions, without the risk that the label peels off.

WINE RANGE BARRIER PAPERS
